

Are you a technical talent and you like to work with Printed Circuit Boards? Do you have electro technical skills, like soldering and you have SMD component knowledge? And do you like to fix electronic parts, then we are looking for you!

We are looking for an enthusiastic new colleague for our hardware test department.

## Test Engineer Electronics (m/v)

### Job descriptions

With a small team you're responsible for the quality of our own designed and produced printed circuit boards. You will perform visual inspection and a 100% test to make sure all the functions of the PCB is working. When a part of the circuit is not working you need to repair it according IPC rules. You must have manual soldering skills and SMD components knowledge. You have the final responsibility of our products before we ship them to our customers.

### Responsibilities

- Test and repair of our electronic products (printed circuit boards, etc.)
- Record the test results of our products.
- Tests will be carried out according to specially designed test procedures.
- You have the final responsibility of the quality of our products.
- Work under the "ESD" and "IPC" rules.

### Requirements

- A completed education MBO Level 4 Electronics or equivalent.
- Interested in working with printed circuit boards, electronics and computers.
- Analytical skills for finding and fixing problems.
- Knowledge in the field of computers systems.
- Soldering skills for SMD components.
- Good knowledge of the English language (both written and verbal).
- Flexible attitude.

### We offer

- An international, informal and collegial working atmosphere.
- A team of enthusiastic colleagues
- A competitive salary
- A good secondary employment package
- Training and personal development opportunities.

### Who we are

Founded in 1965 in Leiderdorp, The Netherlands, Praxis Automation Technology is a manufacturer and supplier of automation, navigation and green propulsion systems for sea going vessels.
